SUMMARY

Software developer with hands-on experience building scalable applications through internships and real-world projects. Skilled in system design, problem-solving, and developing efficient, secure, and maintainable solutions. Passionate about continuous learning and adapting to new technologies to create impactful and reliable software systems.

EXPERIENCE

Full Stack Development Intern– 1M1B Green Internship

- Developed and optimized sustainable web applications by integrating energy-efficient green cloud solutions and contributing to eco-friendly digital initiatives aligned with environmental sustainability goals.

Monitoring Automation Intern– Zoho

- Built a custom Site24x7 monitoring plugin using PowerShell to collect real-time system/process metrics, structure JSON data outputs, and optimize performance monitoring dashboards.

PROJECTS

- RuralCareX**

Rural communities often lack timely access to healthcare services, medicine availability, and specialist consultations due to limited infrastructure. RuralCareX addresses this challenge by leveraging **React, Node.js, Express.js, Prisma, SQLite, Google Gemini AI, and WebRTC** to provide AI-assisted symptom analysis, telemedicine, digital health records, and real-time pharmacy inventory management on a unified platform.

- Community Connect**

Community service activities and urgent requests such as blood donations are often managed through fragmented channels, causing delays, poor prioritization, outdated posts, and lack of transparency. To address this, a centralized and secure real-time collaboration platform was developed using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, enabling structured request management, role-based access control, automated expiry, and efficient community coordination.

SKILLS

- Language:** Java, C++, JavaScript
 - Tools & Frame works:** React.js, Express.js, Node.js, MySQL, Mongo DB
 - Full stack development, Web development
 - Soft Skills:** Leadership, Time Management
- Languages Known:** English, Tamil

EDUCATION

- B.E. Computer Science and Engineering
 - Easwari Engineering College, Chennai
 - Pass Out: 2027, CGPA 8.67
- Higher Secondary (HSC)
 - Tagore Matric Higher Secondary School
 - Pass out:2023, percentage: 94.83%

CERTIFICATIONS AND ACHIEVEMENTS

- Java SE 17 Developer – Oracle University
- 200+ LeetCode problems.
- Finalist: Dekathon 3.0, Nexathon'25
- Participated Hackathons: Techathon (IITM), Accenture, Flipkart (online hackathon), TVS credit, Smart India Hackathon
